## About Huangbian Village

The first time I went there, the environment left me a very bad impression, and I was aimless to wander in the village, only to feel that the environment there is very bad, there are a lot of rent advertisements.

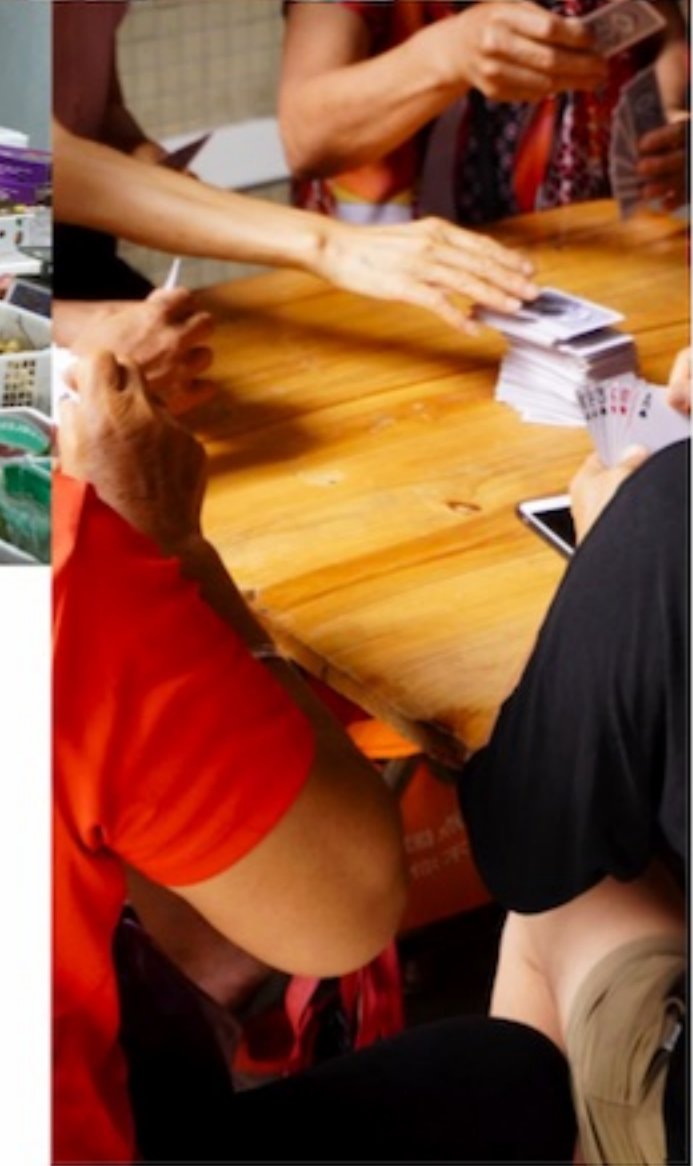

But the second time I went there, I saw a group of old women playing cards, their cheerful atmosphere attracted me, also gave me inspiration. So I want to start with their living conditions.

abundant life  
The kids were very curious when they saw us with the camera. They seemed to want us to take their picture

When I was walking around the neighborhood, I found that there were many, many barbershops and they were all very cheap

In fact, in this small village, there are many grocery stores, fruit stores and so on to take care of everyone's life

Some grandparents get together to play cards to pass the time

Rubbish everywhere

In this village there is a mountain of rubbish, the environment is very bad, rubbish in the cracks, there are cigarette butts in the sewer, some rotten fruit, piles of beer bottles

The public bikes are placed at random, and even the QR code on them is unidentifiable
