

# Lost and Found

*My inspiration comes from an experience of being helped.*

## Initial Idea

*Sense of lost*

When I was a child, I went out by myself and took the bus to buy books. But I didn't hear the radio of station clearly, I got off at the wrong station and went to a completely strange place. At that moment, I was very flustered and scared. Nobody there and I only just try to walk around. After a while, I met a grandpa and asked him the way. He is very kind, told me the right way and took me there. In the past, my family told me that not to trust strangers. There are many bad people in the world. But after this experience, I think there are more good than bad in the world.

# Research

## Lost

I believe that many of us have experienced of being lost. It may be a trouble we can't solve, or a unknown direction. People living in the city and lost **original** themselves. A child lost her family in a war and **hopeless** for future. Or you may feel like you are **incompatible** with peers and you will lost your **personality** in order to integrate into society. Being lost can be **confused, buoyant, cruel** and **imaginative**. The **feelings** are change with what people are experiencing at the moment.

## Help

In the animal kingdom, animals of the same race are **amicable** and willing to help their fellow animals. But once animals of **different species** have friendship, they can also get along very well, they will not **shrink back** even in the face of strong enemies.

## Found

I think the direction have two meanings. One is correct direction that need to find out when people get lost. It is essentially direction of the destination. Another meaning is to find out **value of ourselves** and **right position**, is the direction of life, more like a feeling of being able to **self-motivate** and **elevate** yourself towards your goal. Only by realizing clearly what you really want that can move forward towards your goal. However, there are something or someone will encourage you to move on.

# Narrative Jewelry

Using jewelry as a medium that allows the creator to communicate with the viewer. The decoration of the body is the same form as other art forms with emotional injection.

To me, narrative jewelry is a good accessory to express my own emotion. And only those who are interested in my design will want to know the story behind it.

**Simeon Shomov**

He's works have narrative elements, which are captured with silver and converted into miniature scenes to tell the story through the surface of earrings or pendants. He wanted people to find a part of their soul in his jewelry.

I found that I can abstract the story I want to express and design it on jewelry.

# Geese research

## Geese stayed in formation like

They fly all day, the strength of one goose is not enough, must help each other. On long flights, geese save energy together, in order to fly fast and fly farther. On the long flights, geese save energy by using the updraft to glide. The leader geese flap its wings, creating a weak updraft, and the geese behind it use lift to glide easily. They fly one by one, they formed a neat procession.

## Geese heading south

Wild geese like to eat plants and aquatic plants. When the weather become cold, plants also going dormant, reducing of their food forcing them to fly to south for live in areas with enough vegetables. In winter, the southern hemisphere has longer hours of sunshine, warmer weather and more abundant food to help them survive or raise their birding, which is why so many migratory birds migrate south each winter.

# The Story

## Things started when winter was coming...

The cold air in Siberia came especially early. **Goose had to fly south to away the cold winter.** "Daisy!" a little goose flew towards Daisy. "We need to fly to Australia!" Daisy, immediately gather with her family. "Everyone is here. Our destination is warm south." Daisy's father said, "children fly among us, be sure you are keep up with us!"

**A group of geese are flying in the sky.** After a long time flew. Geese are tired and can't support flying.

## Let's have a rest, find a safe place to relax...

**Daisy has unknowingly left his family.** Suddenly, Daisy realize **she have lost the way.** She is vast and hazy. Then a figure appeared.

**In front of Daisy was a very dangerous animal, python.** Daisy is flustered. "Hello, kid." Python climbed towards Daisy. "Oh, don't be afraid. I haven't seen any new friend been here for a long time." The little goose soon believe python that who look very friendly. **Daisy relaxed and felt that they were very speculative and had regarded him as a friend.**

Daisy remembered her parents' advice, **"I should back to my family,** I've been away for so long. "After a while, Daisy saw her family. Python moving faster and faster, Daisy also quickly flew to her family.

## Mom ! Dad ...

"Where have you been?" "I got lost. My new friend sent me back." Python climbed towards the geese **"Everyone will be my food!"** Daisy still can't believe that her friend was utilizing her. Geese flying high to elude but how can the Python let them escape, **he rushed over and catch small geese.**

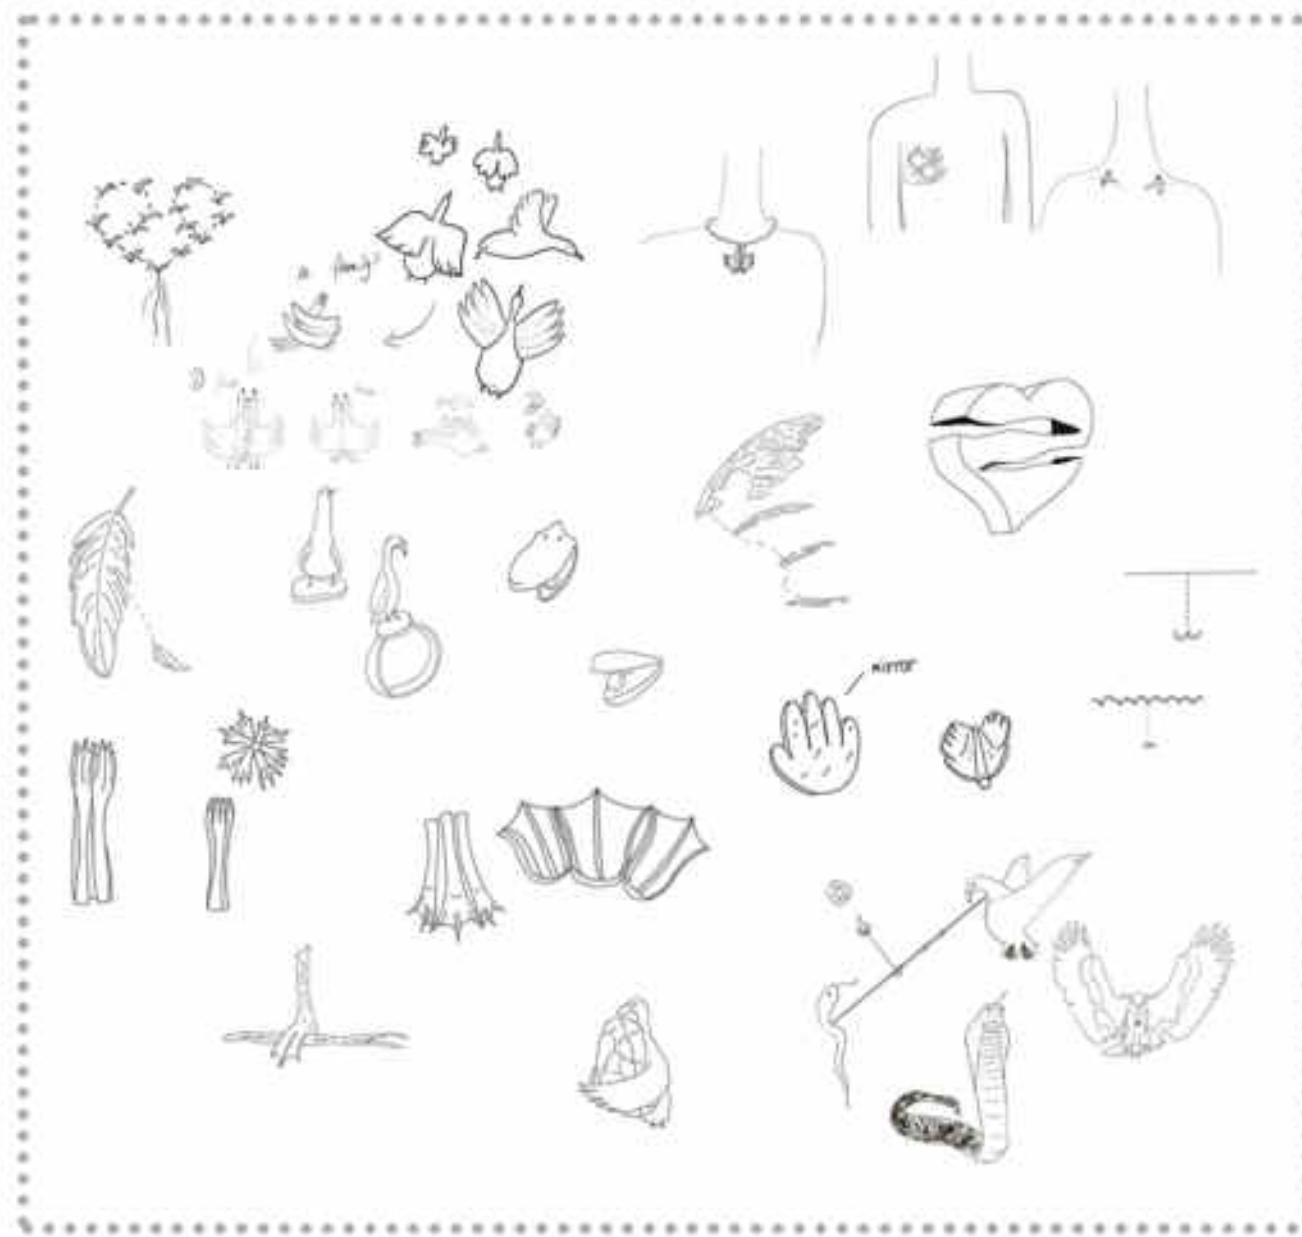

At this moment, **an Eagle stop Python.** The two quickly wrestled together, they had been hostile for many years and didn't have the outcome. **Thence Python run away.**

"Python has been doing many bad things. My kids were eaten by him. I don't want others to undergo the same experience as me." In Daisy's eyes, the eagle is the great benefactor who saved her from danger. **His image is deeply imprinted in her mind.** After that, geese continued to fly south.

## Design Sketches

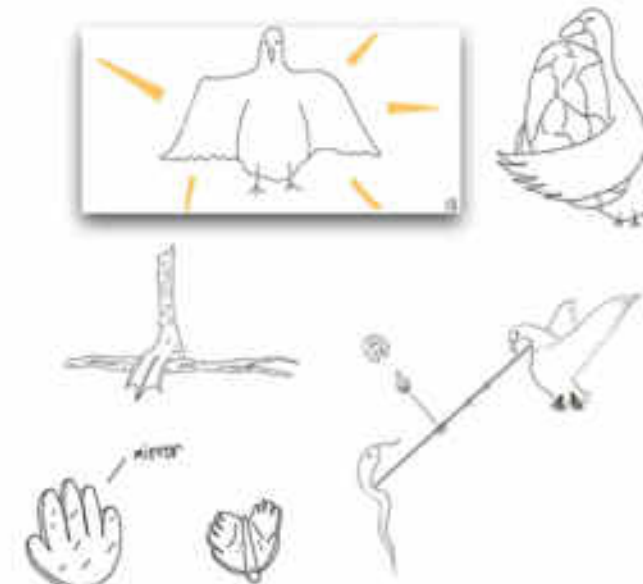

### Lost

### Confused

### Direction

### Reunite

## Working Process

Begin to carve the wax into the image of the design and Made of silver.

Anneal the white copper sheet and knock out the desired shape.

Try to put enamel powder on it and burn it into glass.

## difficulties encountered

Wax is a very fragile material. If I use too much force, it will break. If it is broken, I melt the leftover wax material to repair it.

When baking enamel, there are many impurities in enamel powder, it often cracks after baking. And the outdoor temperature is too low, it will also begin to collapse.

I filter the enamel powder with a mesh screen, then wash it with clean water for many times until the water becomes clear. After baking, wrap a layer of aluminum foil around the enamel to keep it warm.

Brooch / silver / red copper pipe / enamel powder / 6\*3cm

Ring / silver / 1.5\*1 cm
