

Aesthetic cost

As people have higher requirements for beauty, there will be some aesthetic costs, such as foot binding and waist girdling, which are all expressions of beauty at that time, but these behaviors bring harm to people, which is what I think the aesthetic costs are

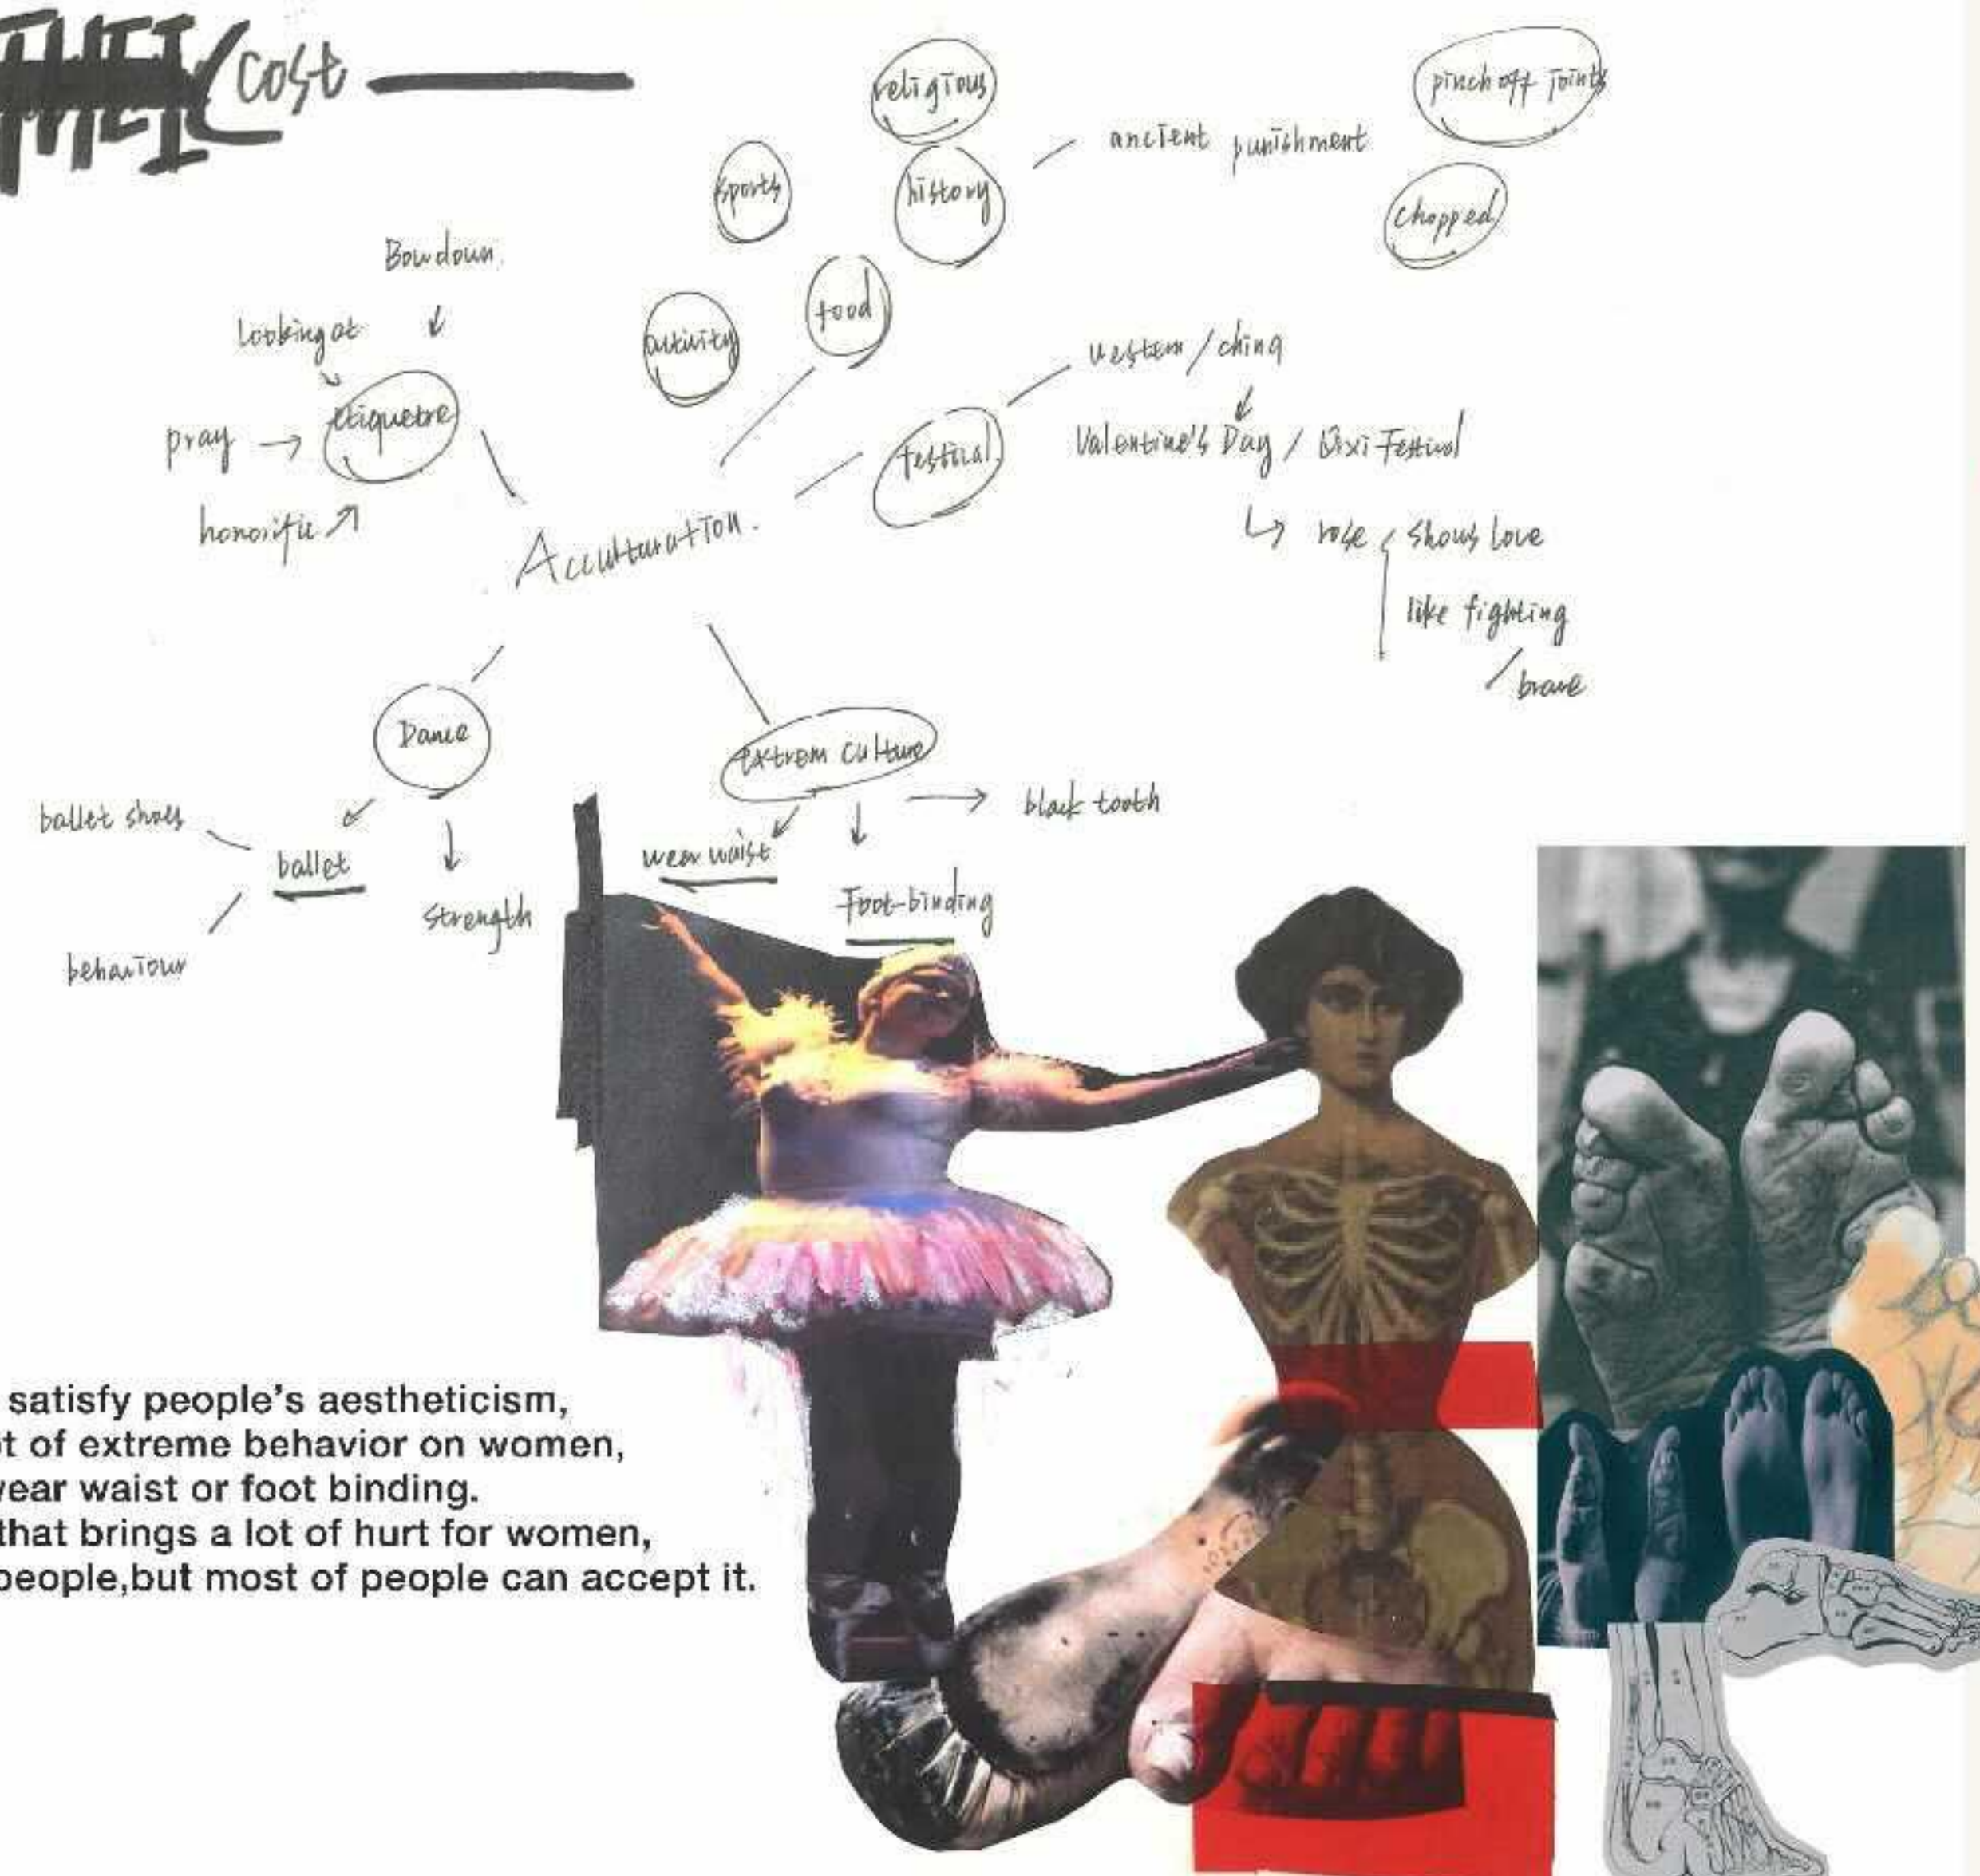

I started dancing when I was three years old, but I gained weight due to illness and medication, so I stopped dancing because when I was heavier it was very difficult to dance and put a lot of pressure on my knees and joints

My development depended on the two key points I thought about in my research, namely reaction force and body compression, so I made some suggestions to express my key points

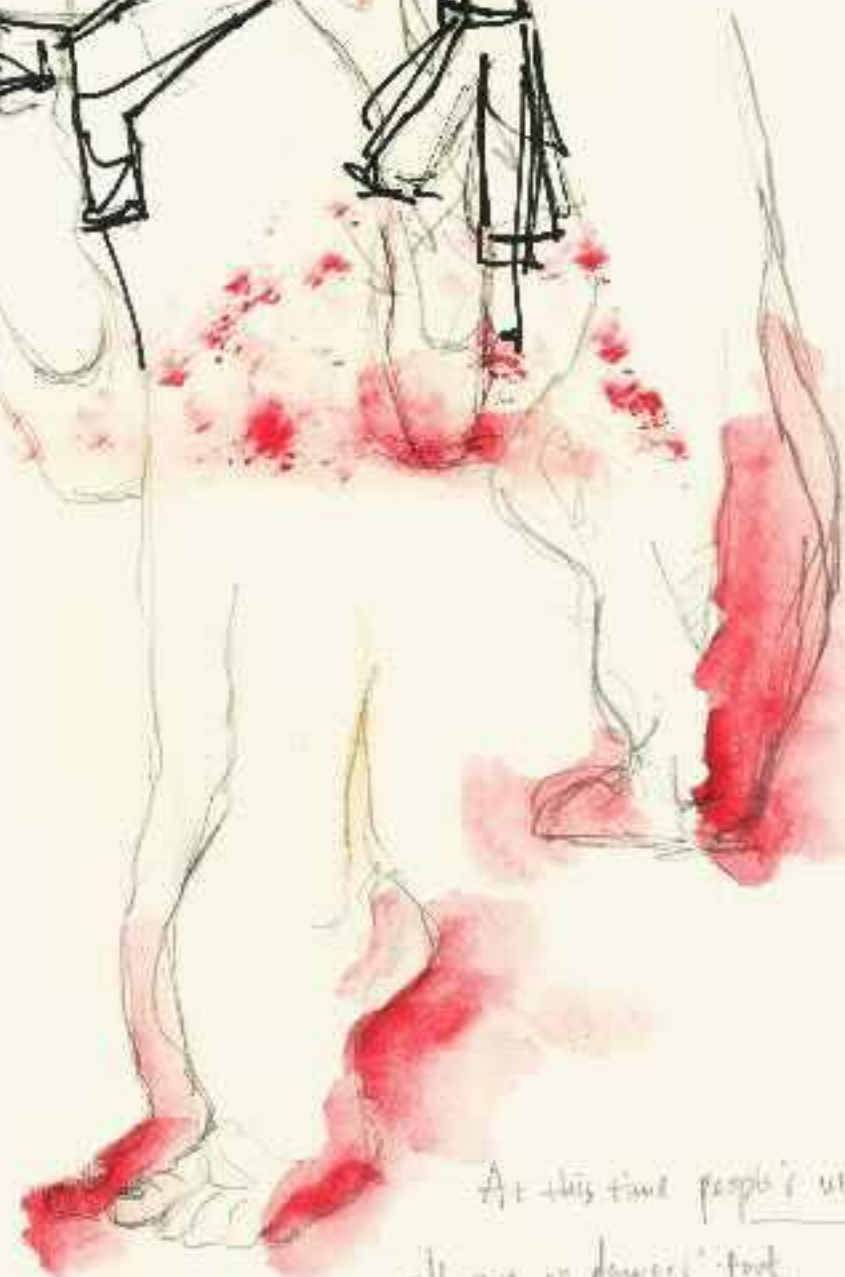

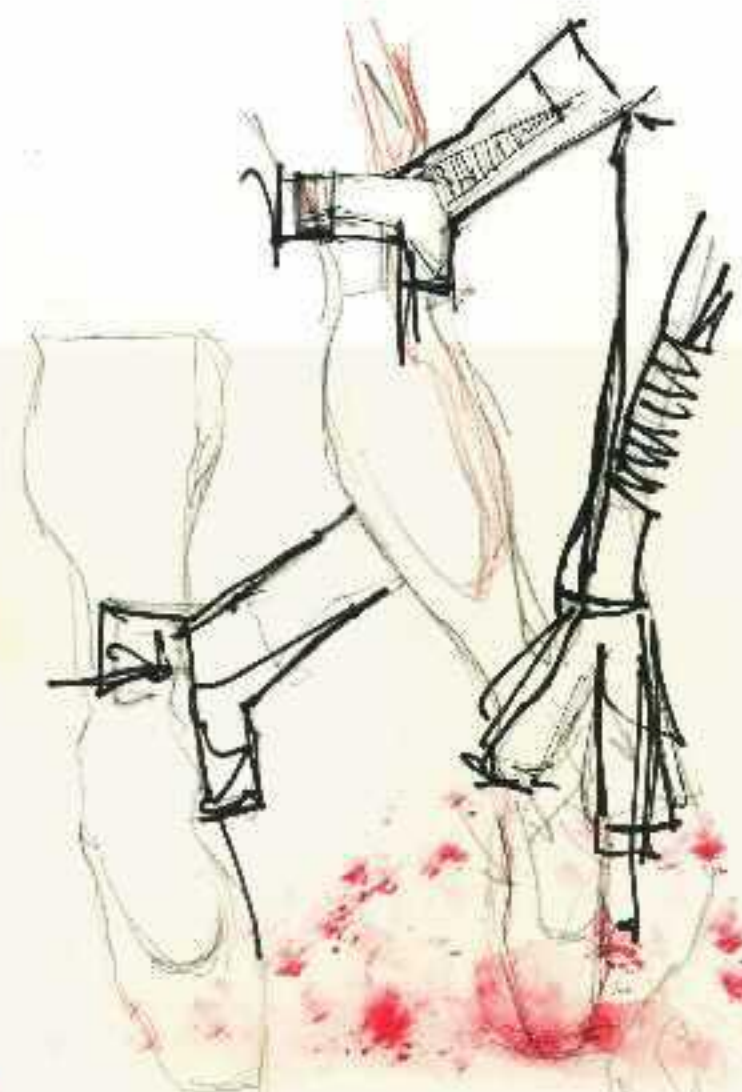

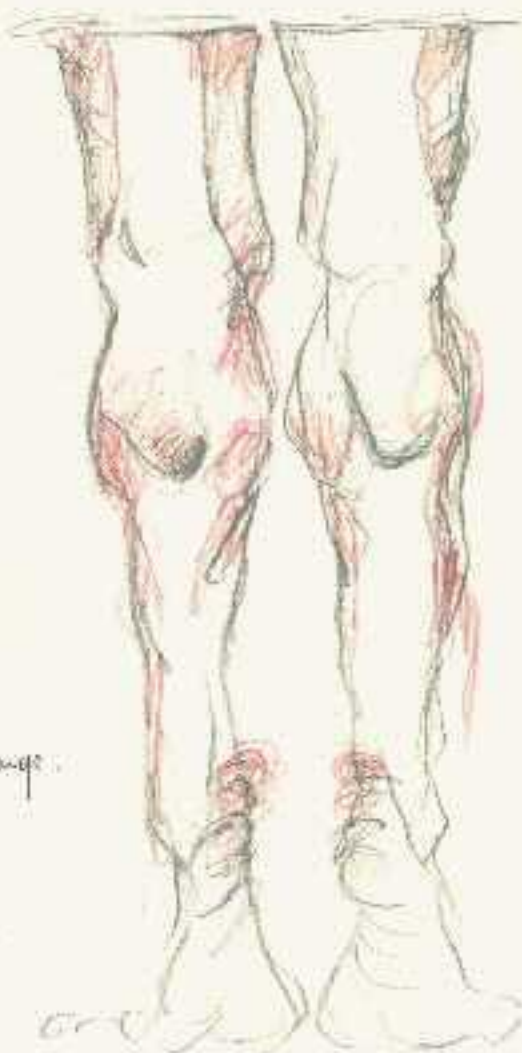

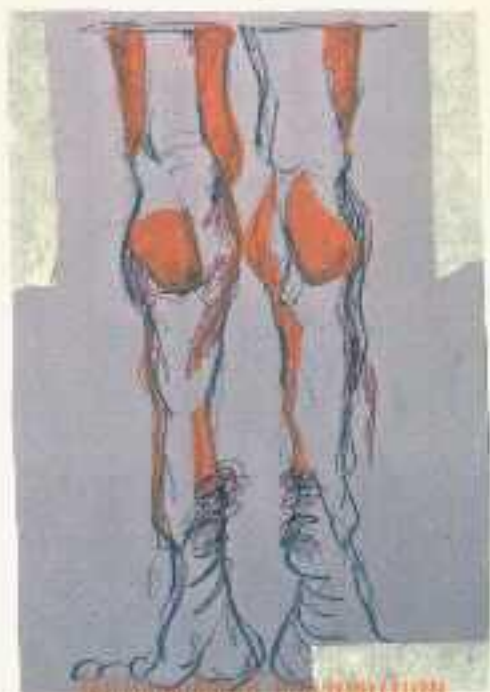

My ready-made fabrics are similar to dance clothes, which is related to my research content. In the process of shooting, I used my own woven fabrics as props, which expressed the bondage and binding of aesthetics on people

~~AESTHETIC~~ COST

In order to satisfy people's aestheticism, there are a lot of extreme behavior on women, like wear waist or foot binding. In my opinion, that brings a lot of hurt for women, ballet also will hurt people, but most of people can accept it.

when people dance - muscle and power will change
and at this time
fleshy muscle become tight

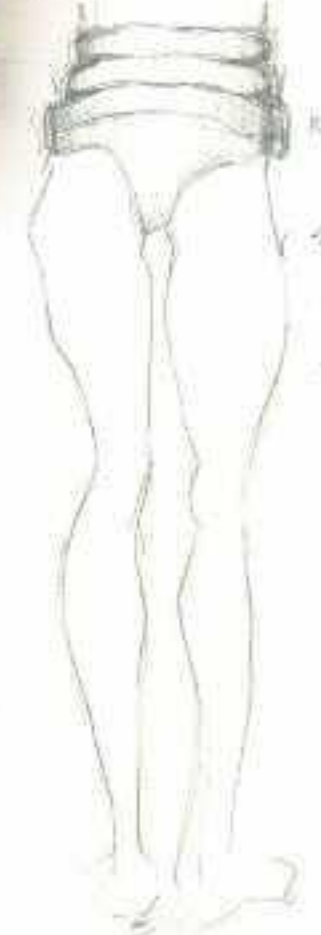

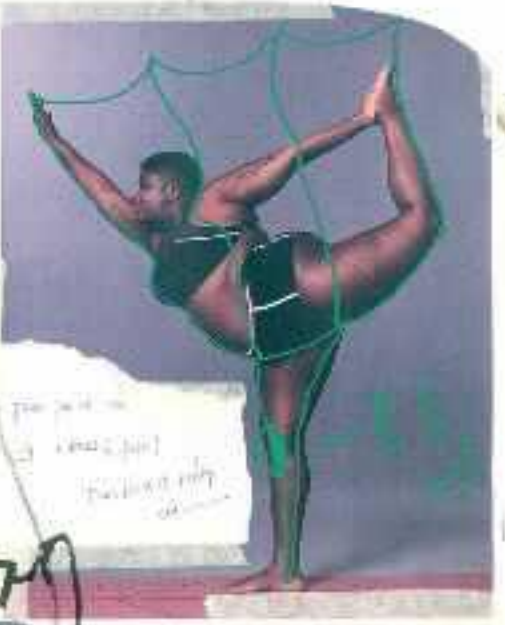

When ballerinas stand on their toes or dance moves,
they affect the muscles in their legs and body,
and they become tense

At this time people's weight
all put on dancer's feet.

(-there is a point in my
knee that some carry
put on each point)

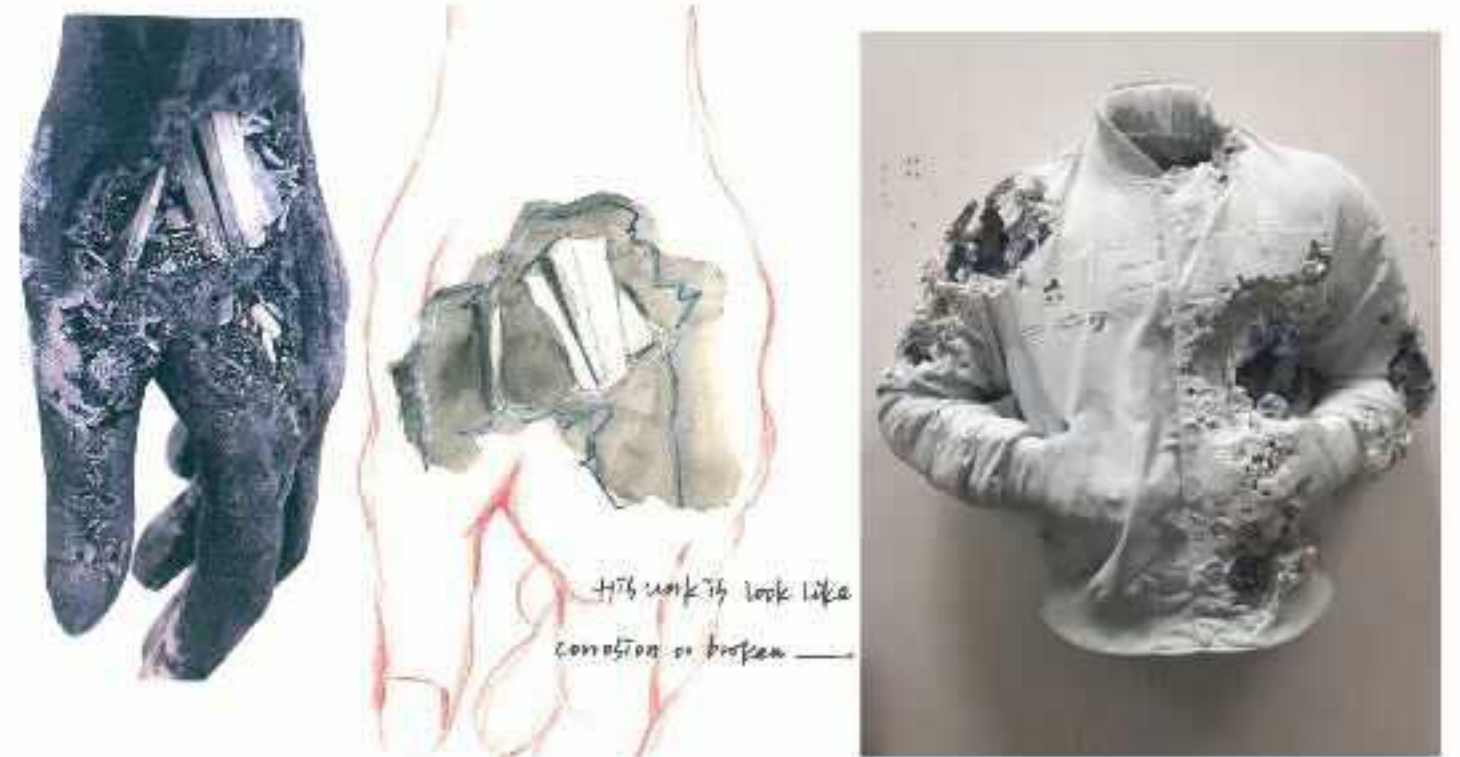

The combination of dance movement and the human body

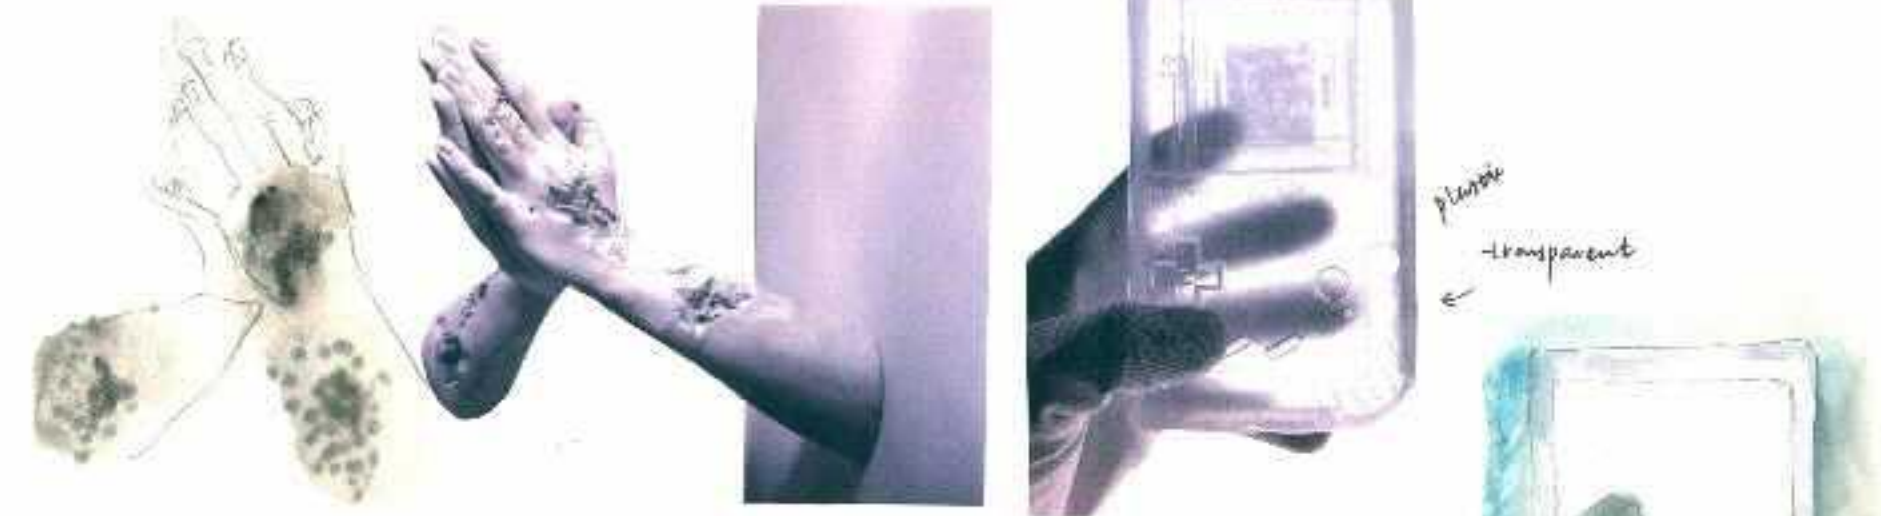

For people squeeze when they...
background some movements cause the feet to squeeze around the waist

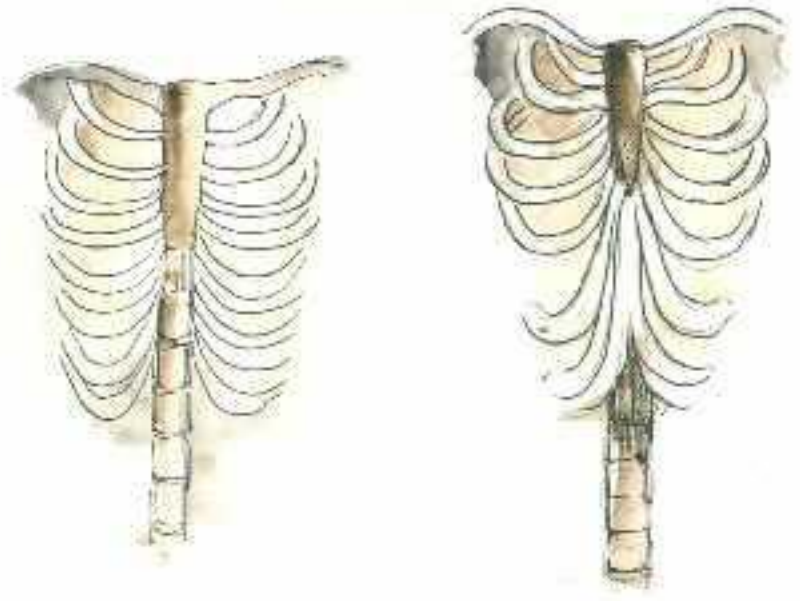

Artist research about daneil arashman who has a strange disease. He sees the world with a different perspective from normal people.

His work is look like corrosion or broken

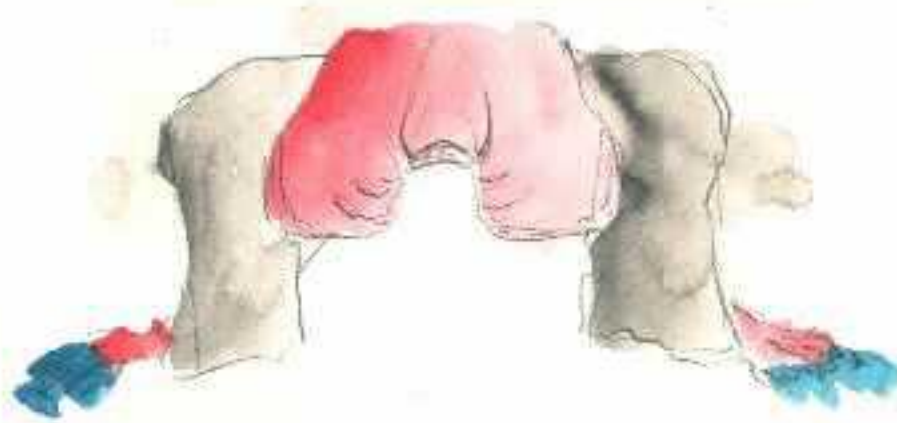

plastic transparent

Similar to footbinding, wearing corset in ancient is also an extreme behavior, but there was a difference which is corset is the beauty pursued by European, but footbinding is a way to control Chinese women.

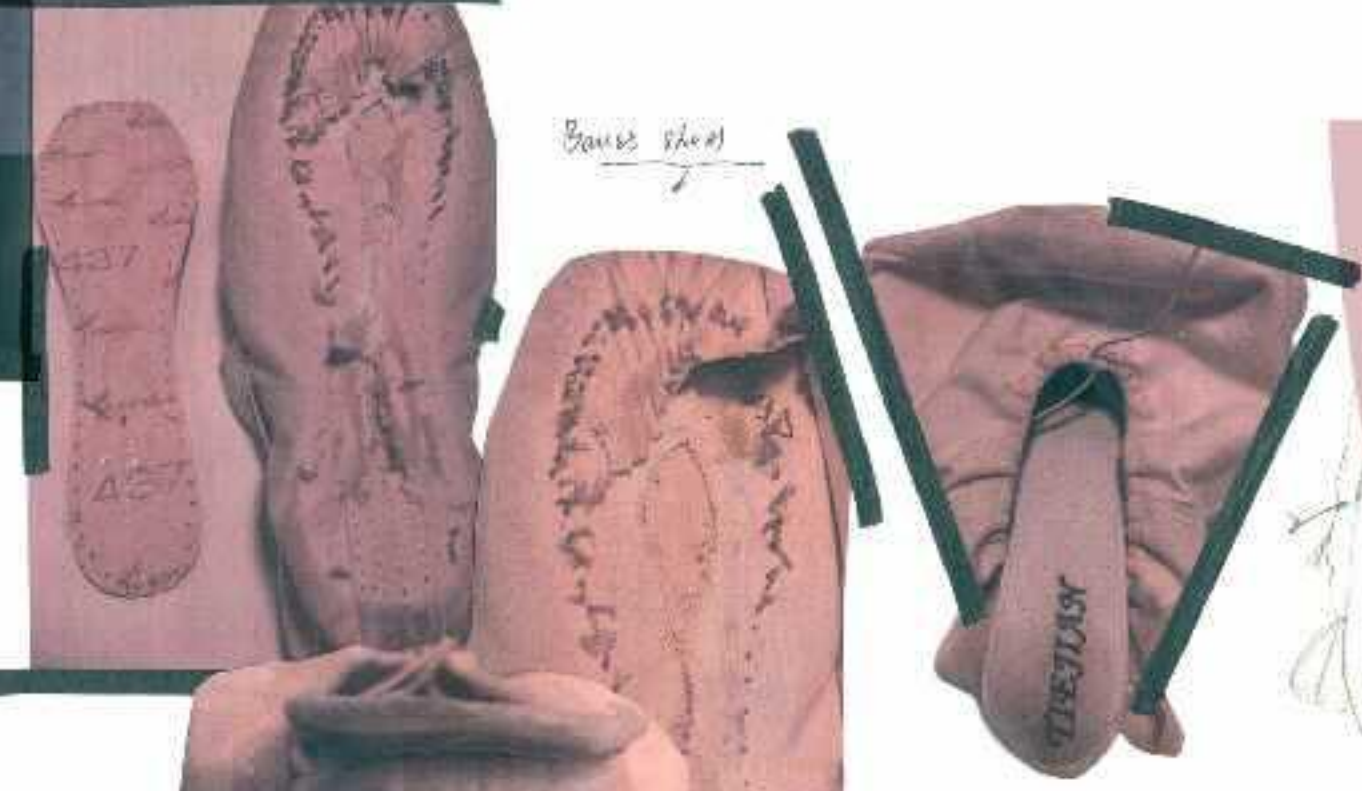

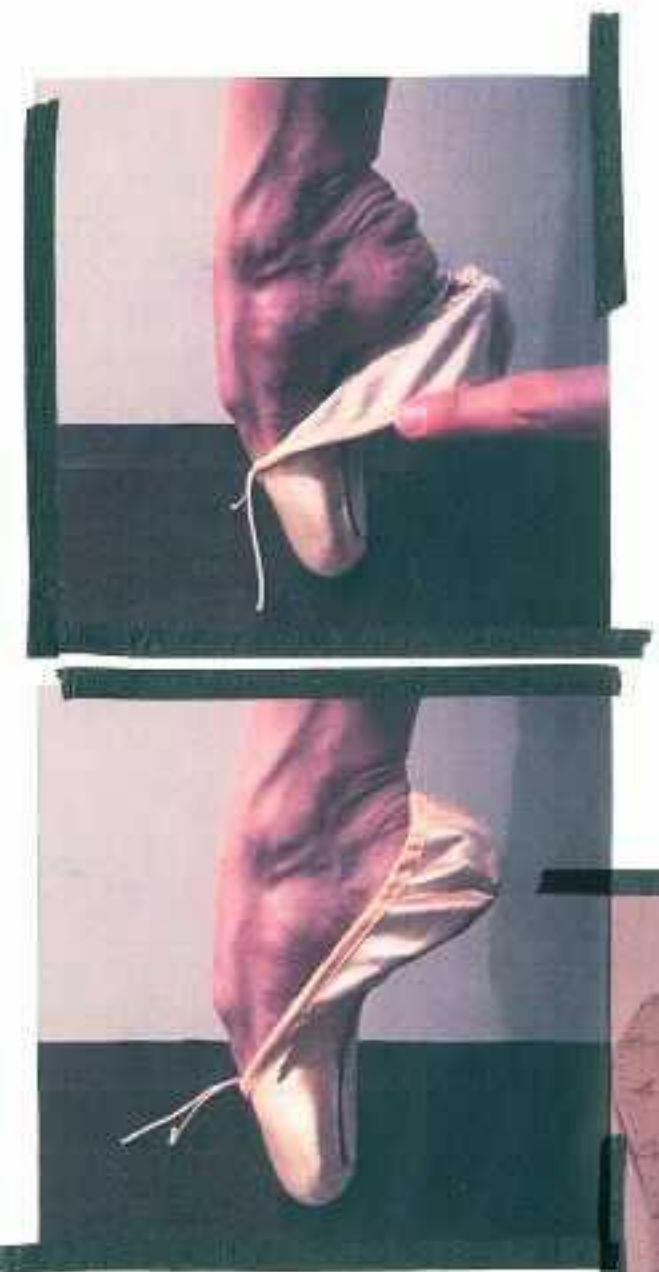

Experimentation

this is a experiment about try some physical extremes

Dismantling of ballet shoes

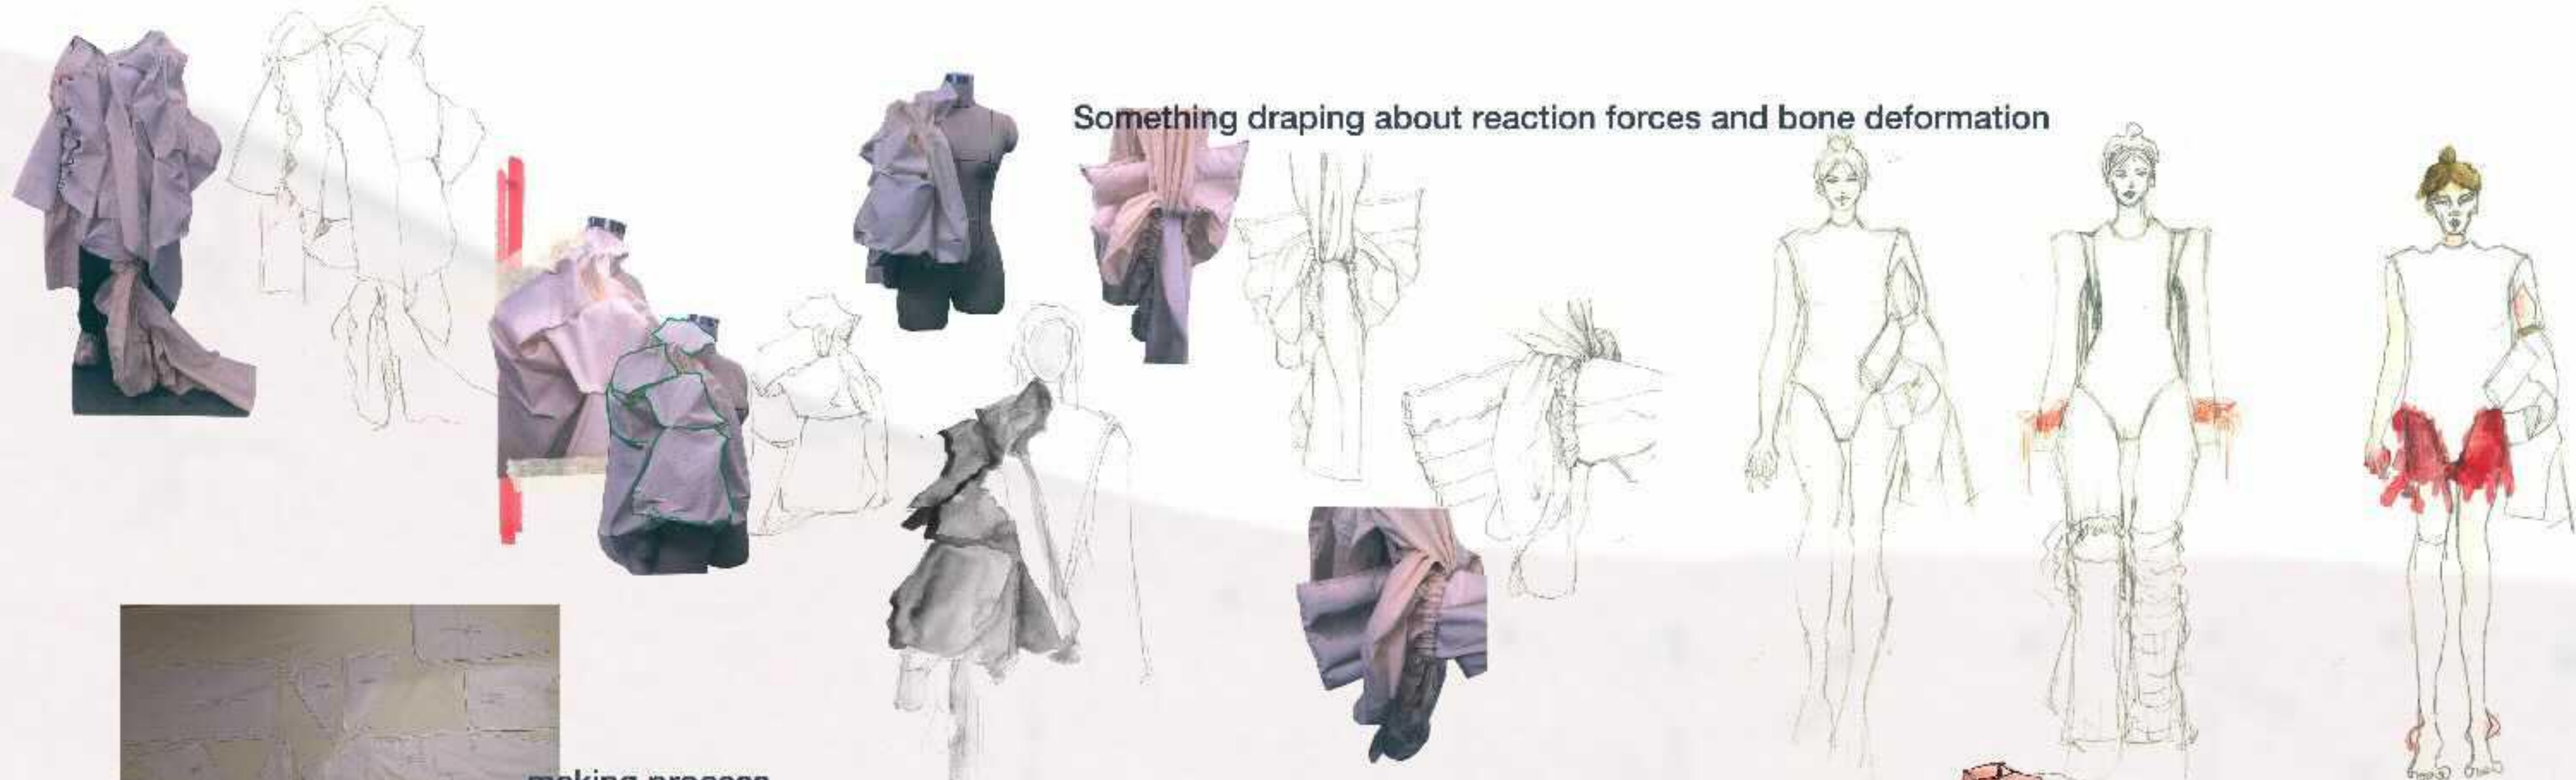

Ballet shoe

Draw up

Something draping about reaction forces and bone deformation

making process
