PROJECT 01

❖ Fetter

In this project, I made two output forms, one is installation and the other is folding books . I wanted to express the idea of bondage between me and my parents by using the most direct form of the human face.

INSPIRATION

Growing up, I often argued with my parents because I didn't see things the same way and neither of us could accept the other's point of view when I was in the second year of high school I told my parents that I would live by myself, because there was no environment for me to study in the school dormitory, but they firmly believed that I would study badly outside. This quarrel was particularly vivid in my memory as I had read a selection of Gibrans poems it also got me thinking about what parents and children should be like.

Red star video 

Nov 13 12:46 from micro video has been edited

On November 13, a body was pulled from the Yueyang River in Anyue District, Sichuan province. It was reported that it was a student who ran away from home after a quarrel with his family four days ago and jumped into the river. In this regard, Anyue police confirmed that the body found in the Yueyang River is indeed the previous family to the police for help looking for students, the specific situation is still under investigation. Red star video micro blog video packed full text ^

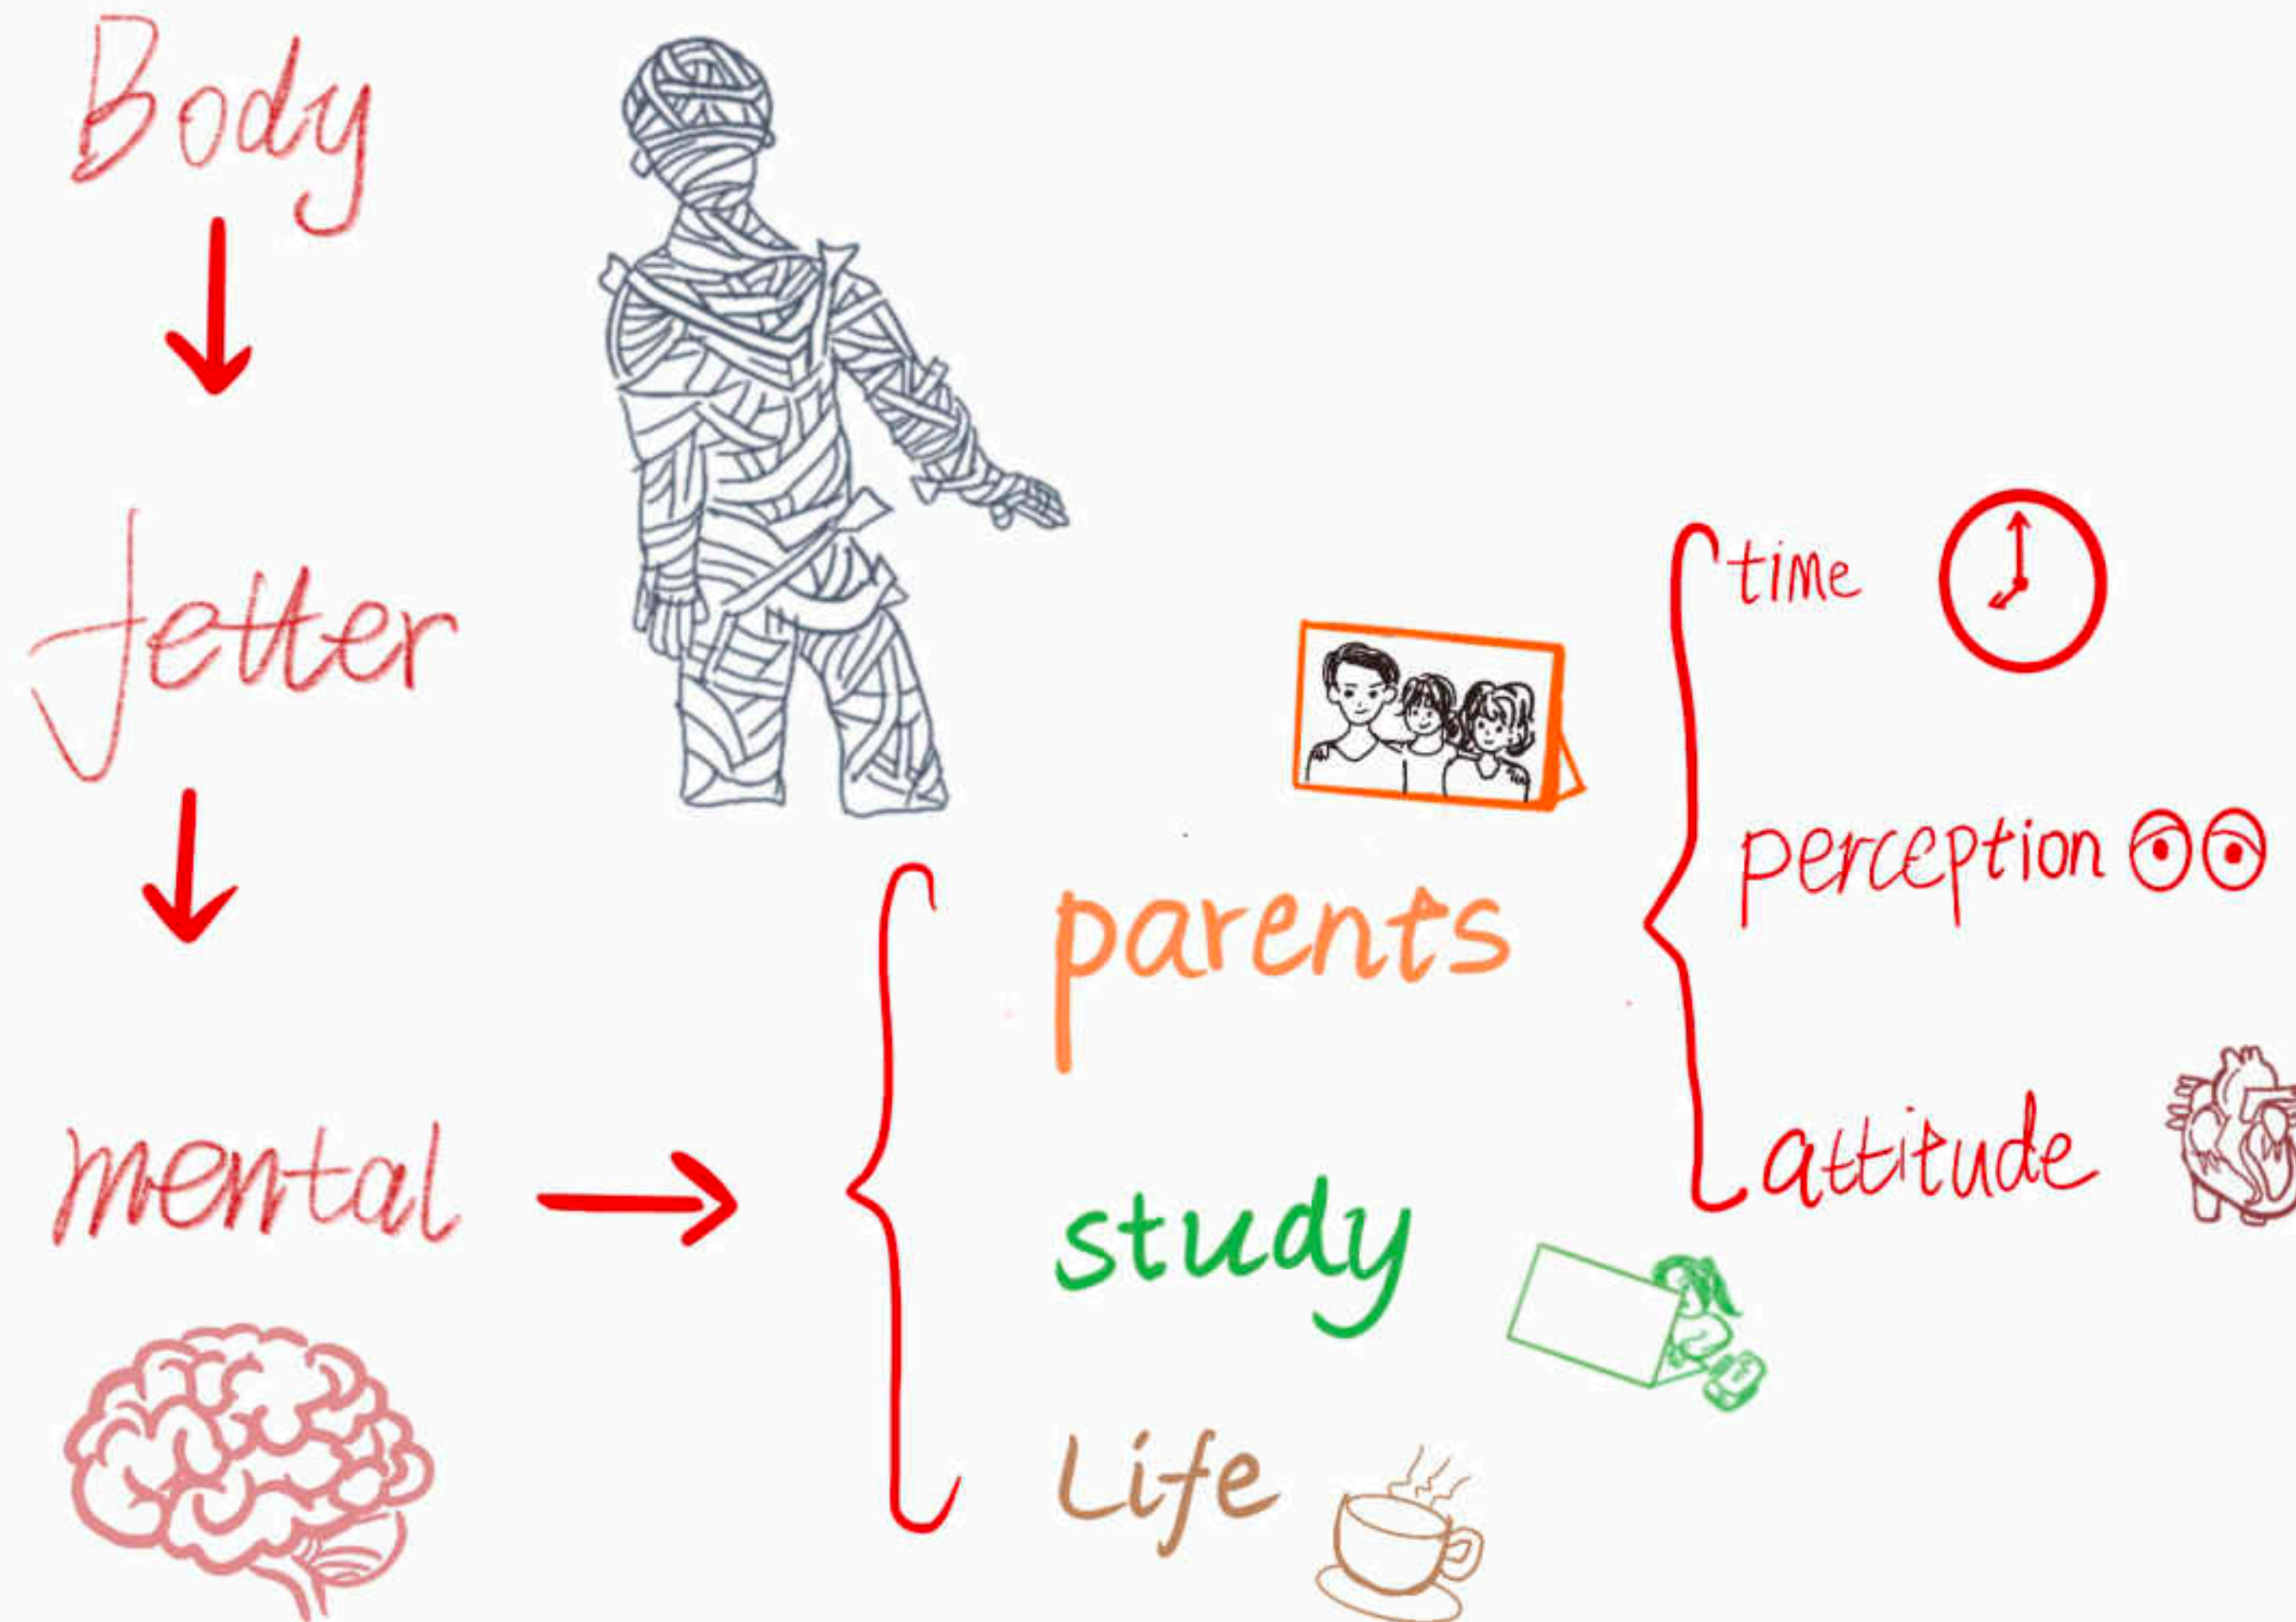

Renqi, now 14 years old, new gan 'an school, this month 9 in the morning from the Anyue County Xingjiang Street (county youside) ran away from home, took a mobile phone without card, his family members do not have his contact information, the home has been issued by the police, word attention, once found, please call immediately with the thick contact with the family, thank you very much here, WISH a good life peace! The above information

I real, the situation is real, so I forward!

MINDMAP

ARTISTS RESEARCH

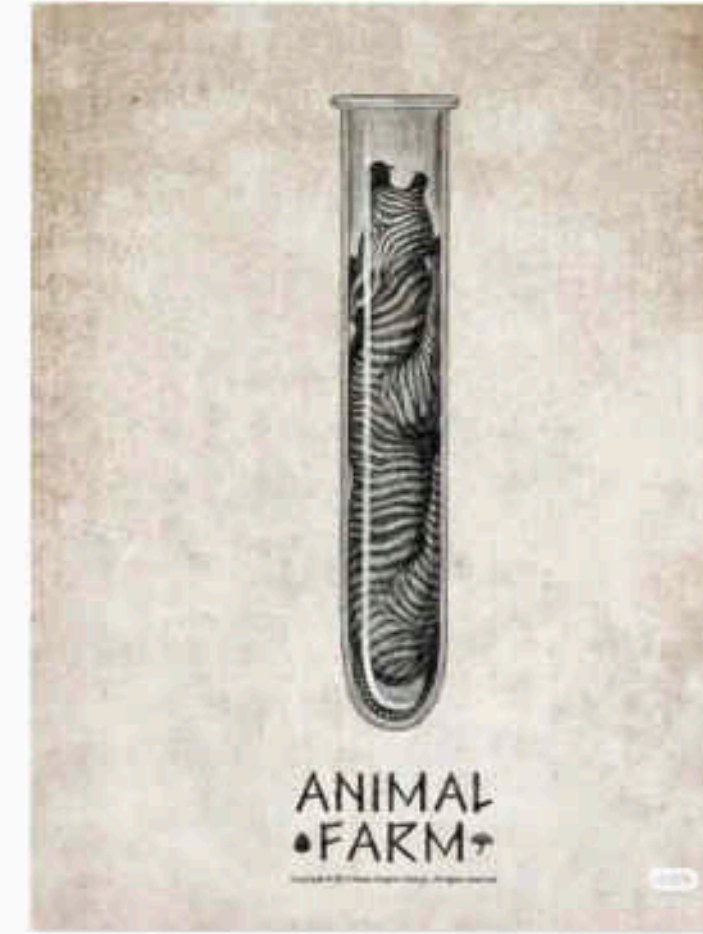

Shir Pakman

I didnt want my parents to change my image

Sean fox

The feeling brought to me by the picture is very depressing and reminds me of the pressure brought by my parents

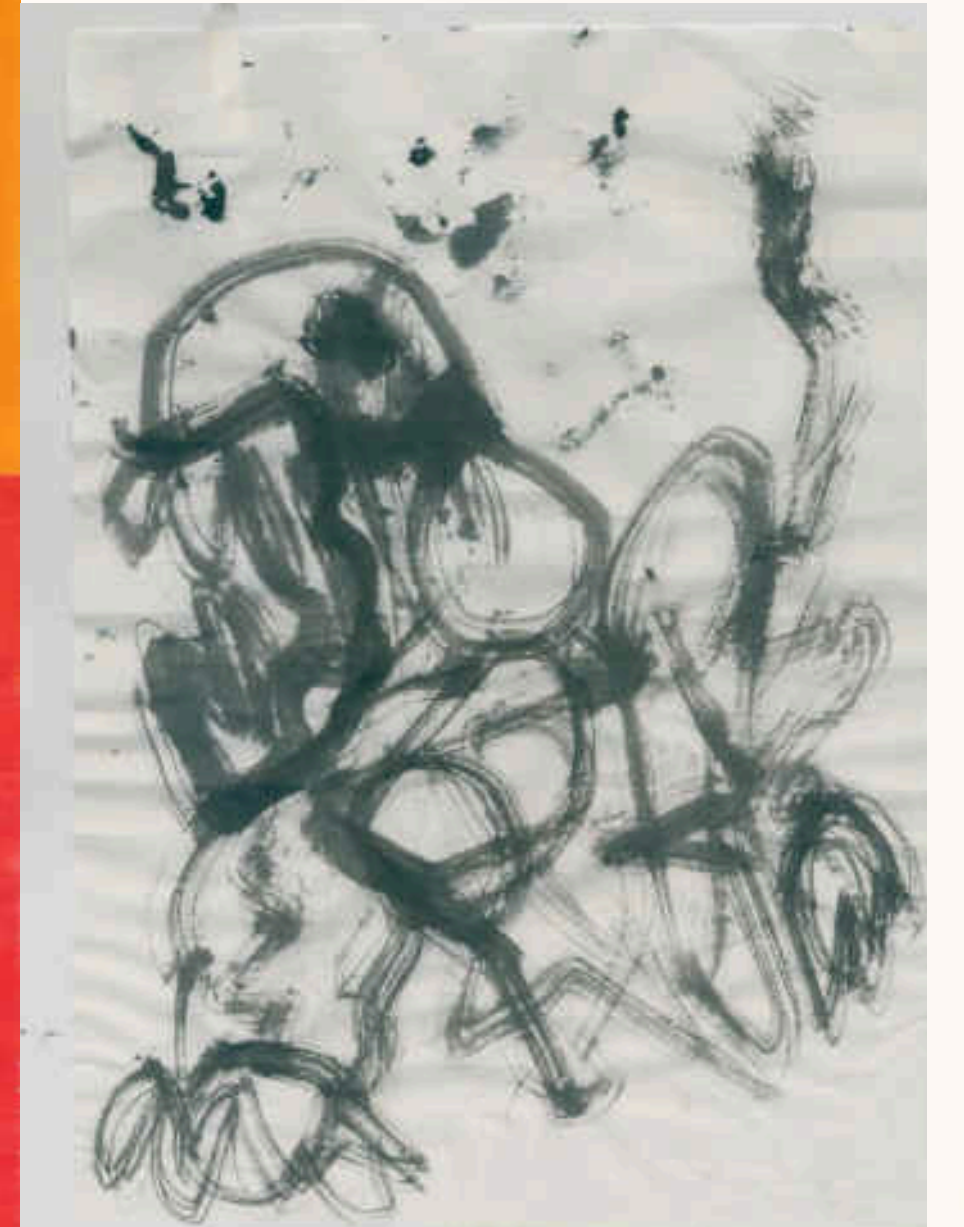

Bsen 阿达

The zebras in the picture are trapped in bottles to show their helpless plight

VISUAL RESPOND

SKETCH

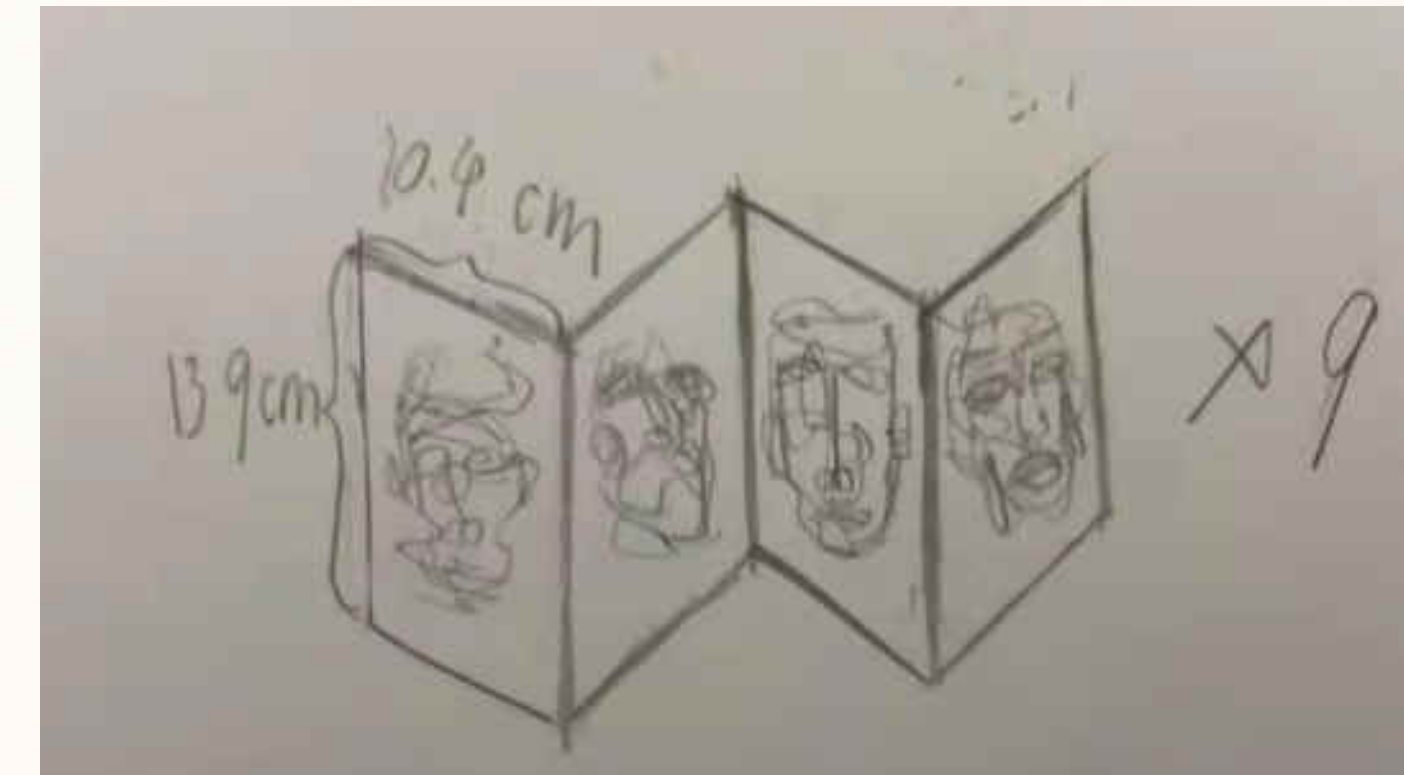

EXPERIMENT

I tried the effect of several materials and finally chose the ink, and then experimented with the shade of one color of the ink

◆ Imagine

On the right are my experiments with cover art. I experimented with ink shades and shapes, and finally chose the one I liked best

Fear

OUTCOME 01

idea

This is an attempt of my water baby. I think the growth process of water baby is similar to human growth. At the beginning, water baby grows wantonly and becomes more and more fragile later. At this point, there are some factors that constrain water babies. When the water baby can no longer bear its pressure, it will break. I came up with this idea for the bottle device
